Kalwall®
Since 1955
High-Performance, Translucent Wall and Skyroof® Systems
What Kalwall is...
The most highly insulating daylighting system in the world!

The primary element of the Kalwall System is a flat or curved, structural composite sandwich panel formed by permanently bonding specially formulated, fiberglass-reinforced translucent faces to a grid core constructed of interlocked, structural aluminum/composite, thermally broken I-beams.

The natural thermal properties of the sandwich panel can deliver increased energy performance by the inclusion of translucent fiberglass ‘batts’ or aerogel during the manufacturing process and by specifying a fully thermally broken grid core. U-value options range from .29 to .05 (1.57 to .28 W/m²K) by NFRC for the 2 3/4” (70 mm) thick panels and .15 or .08 (.83/.45 W/m²K) for 4” (100 mm) thick panels.

Kalwall panels are installed with the efficient, proven Clamp-tite™ aluminum system.

A Highly Insulated Structural Unit...
Outstanding load capacity and structural integrity!

Superior Structural Thermal Break Composite Grid Core
• 2 5/8’’ (68 mm) I-beam • 1 3/4’’ (44 mm) Non-conductive break
• 4’’ (100 mm) I-beam • 3 7/8’’ (98 mm) Non-conductive break
• Stronger than aluminum • Passes fire testing to 1200°F
• Superior insulation in panels — U-values as low as .05 (.30 W/m²K)
• Stops condensation — CRF 80+

Kalwall®
Thermal Break

Poured and debrided technology does NOT work! And is not Code-approved!
8 Daylighting Systems...

Wall Systems

- Structural Sandwich Panels up to 5' x 20' (1.5 m x 6 m), 2 1/8" (70 mm) or 4" (100 mm) thick are secured to building with simple, Clamp-tite™ aluminum extrusions. System seals panel/panel and building, allowing for expansion/contraction and proper weepage to channel any moisture to building exterior.
- May be either flat or curved sandwich panels.
- Controlled, natural daylight combined with finely tuned thermal and solar controls.

Unitized Curtainwall

- Sandwich panels, operating/fixed windows, louvers, even opaque panels, factory unitized.
- Provide rapid installation and permanent weather seal, unlike most stick-built, "frame and glaze" components that are all field-assembled.
- Delivered to the job site in large preassembled units up to 5' x 35' (1.5 m x 10.7 m) and larger.

The Single-source Solution!

Window Replacement

- Kalwall heavy-duty Window Replacement Systems – like our prefabricated Curtainwall Systems – are factory-assembled into easily managed building units.
- Kalwall provides optimum performance-controlled daylighting and still allows for fulfillment of vision/ventilation requirements.
- Vandal, graffiti, and impact resistance add up to minimal maintenance expenses with Kalwall.

Standard Unit Skylights

- 2 1/8" (70 mm) and 4" (100 mm) thick flat Skylights up to 5' x 20' (1.5 m x 6 m).
- 2 1/8" (70 mm) Pyramids from 4' (1.2 m) square up to 20' (6 m) square.
- 2 1/4" (70 mm) Geo-Roof® units in 17 standard-sized units from 8' to 24' diameter (2.4 m to 7.3 m).
- Available knocked down or prefabricated.

OSHA Compliant
Endless Possibilities

Pre-engineered Skylights

- Centerline self-supporting ridges with 20°, 27°, 33°, 45°, slope to 24' (7.3 m); 2½" (70 mm) or 4" (100 mm)
- Kalcurve® 180°, Low-Profile 90° in 1' (300 mm) curb width increments, to 25' (7.6 m).
- Lightweight – less than 3 lbs. per square foot (16 kg/m²) means substructure may be minimized. Only thrust-bearing curbs designed to accommodate local live, snow and wind load designs are required.

Custom Skyroof® Skylights

- Sandwich Panel Systems over substructure designed and installed by others.
- Flat, curved or combination for design versatility and consistent with all Kalwall Systems.
- Easy, fast installation, coupled with large-sized panels to speed installations.
- 2½" (70 mm) or 4" (100 mm) possible

GREEN — LEED®

Walkways & Canopies

- Combinations of sandwich panels and framing components.
- Standard modular walkways.

NEW!

- Fully pre-engineered canopies and walkways, including aluminum structure, are now available!

Clearspan™ Skyroofs

- Taking Kalwall to another dimension... aluminum box beams and Kalwall panels form monolithic, structural enclosures.
- Design control, fabrication, delivery and complete installation with single-source responsibility!
- Installations completed in weeks – not months – due to component standardizations and CAD technology.
- Complete buildings, including Pool Enclosures, featuring built-in non-corrosion and moisture resistance.

www.kalwall.com
Pre-engineered panel units allow for exceptionally rapid installation, leakproof performance and superior system integrity.

Panel Units are factory assembled complete with options such as louvers, fixed or operable windows. Also hurricane-resistant windows to TAS and ASTM standards.

High-performance, Euro-style fixed and operating Kalwall windows with Euro-groove, multi-point locking for maximum safety and security.
LOUVERS – WALL SYSTEMS
Specify Kalwall fixed-blade louver as required, up to 5’ (1.5 m) wide.

THERMAL BREAK SASH
Kalwall-manufactured, projecting sash for top performance up to 5’ wide x 4’6” high (1.5 m x 1.4 m). Fixed and egress units also available. Glazing of all types, 1” (25 mm) thick glazing panels available; factory-installed, if specified. Performance options to AAMA/ANSI PI AW-90.

OPAQUE PANELS
Sandwich panel construction with fiberglass, aluminum or other faces can be combined in the same system for aesthetic value or to fine-tune energy performance. Factory-unitized in many combinations up to 5’ wide x 35’ high (1.5 m x 10.7 m) depending on shipping and handling limitations. Panel-units ready for installation with no additional finishing. Panel-units eliminate superfluous structure required with most other systems.

STANDARD PANEL SIZES
Width — 4’ and 5’ (1.2 m and 1.5 m), other widths up to 5’ (1.5 m) are optional.
Length — 3’ to 20’ (.9 to 6.1 m) standard, 16’ (4.9 m) maximum for skyroofs.
Thickness — 4” (100 mm), 2 3/4” (70 mm), 1 9/16” (40 mm) and 1” (25 mm) for window glazing only.

REVERSE SHOUJI
SOME COMMON OPTIONAL GRIDS

VERTI-KAL
TUCKERMAN

METAL FINISHES
The installation system is available in mill finish or Kalwall Corrosion Resistant Finish, a high-performance coating that meets AAMA 2604, 2605 optional. The finish is highly resistant to acids, alkalis, salt, industrial and moisture-laden atmospheres.

INsTAllATION
QUICK, LOW-COST, TROUBLE-FREE
Kalwall factory pre-assembled interconnected structural components form rigid, modular units which replace the heavy mullions and floating panels of other curtainwalls. The unique, pre-engineered construction and extreme structural strength of the components permit the largest panel-unit wall sections to be quickly and efficiently installed.

TRANSlucent COLORS
White and Crystal are standard but other colors are available. The Kal-tint series and pebble finish are options. Colored translucent insulation inserts are available in an endless palette of colors.
For 2\(\frac{3}{4}\)" (70 mm) vertically oriented panels.

These are standard Clamp-tite™ details. Systems for other conditions, e.g., horizontally oriented, concealed fastener, Kalcurve®, Explosion Venting or Blast Resisting, are similar, but do contact Kalwall for specifics. High-performance coatings in Kalwall Corrosion Resistant Finish are standard. CAD versions of these details and more are available at www.kalwall.com.

NFRC CERTIFIED SYSTEMS: Kalwall systems provide the best overall U-values as low as 0.10 (W/m²K). With light transmission up to 20%. Includes perimeter system.

BOND STRENGTH: Panels and adhesives are tested according to the stringent requirements of “Criteria for Sandwich Panels” issued by ICC (International Code Council), ES-AC177.

Before specifying alternates, insist on actual field proof of bond integrity over a 20-year period. Caution is urged in accepting look-alikes as equivalents.

WEIGHT: Most panels and systems weigh under 3 p.s.f. (14.65 kg/m²).
